### **Company Introduction:**

Magic Factory is a start-up for start-ups, enabling world-class funded start-ups accelerate their product development by 2X. We partner with cutting edge start-ups across the globe and help them augment their product development teams with world-class remote developers. With our industry-first software and hardware collaboration tools suite we take the remote out of remote development and our clients feel as if their remote developer is "sitting right next to them".

We are a start-up in the true sense of the word, built by passionate entrepreneurs and entrepreneurial engineers who have a passion for start-ups.

Come join us and work on solving real-world problems with a talented, passionate, and global team. Get exposure to best in class technologies and accelerate your learning curve.
